

# Wind Instruments

# From the Hands of our Artisans...

You'll find our instruments in the hands of musicians from all ages and levels all over the world. Whether we are making a professional level instrument or a student model, our aim is to provide the musician with an instrument that sounds and plays as best as possible, is reliable, and is good for both the user and the environment.

When you pick up a Yamaha instrument, take a moment and think about how this instrument made it into your hands. How it started from a sheet of metal or length of seasoned wood, was shaped into form by the skilled hands of a master craftsman, then assembled and adjusted, again by hand. Yes, by hand.

With all of the advanced technologies we have at our disposal, we still find that the best way to get some jobs done right is to do it by hand,

and it makes no difference as to whether the instrument is a custom pro level instrument, or a student model for a beginner. Constantly in contact with the instruments we make, we are concerned with what goes into them since it not only affects their sound and playability, but the player and the environment as well. That's why Yamaha instruments are made using lead-free solder.

Much like making music, crafting instruments is an art that requires dedication and a passion for perfection. Through our art, we bring the instrument to form, through the musician's art, that form comes to life. We take great pride in passing our art on to musicians young and old, and watching them mature and bloom with the products we make.

**LEAD FREE SOLDER**

**Lead-free Solder**  
 Yamaha wind instruments except gold flutes are constructed using 100% lead-free solder, showing Yamaha's long time concern for the environment. We spent years studying the acoustic changes brought about by the various possible alternatives, and we have discovered a new solder which is not only better for the environment but actually adds harmonic breadth to the sound.

# Handmade Flute Options

When ordering a custom built Handmade Flute there are many factors to consider. In addition to the basic key configurations there are a number of other important variables which help determine the character of your instrument. For an overall view of the possibilities available to you, see the following list of options. If you require more information, please contact your Yamaha Handmade flute dealer.

## Mechanical Options

### ■ C# Trill Key

An additional lever and tonehole which are useful for B to C# trills, but can also be used to facilitate a number of other trills and tremolos.

### ■ Split E Mechanism

This key helps give more stability and better centered intonation to the high E.

### ■ Clutch E Mechanism

A switch allowing players to turn on or off the Split E mechanism as desired.

Under-key type

### ■ C# and D# Rollers

Rollers on the key levers to facilitate finger movements.

### ■ G/A Trill Key

This aids in trilling from G to A.

### ■ G# Open

Removing G# tonehole enables better intonation of high E, even without a Split E Mechanism.

## Engraving

Crown

Lip Plate

Rings

Keys

## Toneholes

### Drawn Toneholes

Walls are drawn upward from the body material, giving the flute a broad, light sound.

### Soldered and Undercut

Soldered toneholes with undercut inner edges give a strong sound with a lot of 'life' in the tone.

## Headjoint

- **TypeA** — The type A headjoint enables the flutist to produce an easy yet colorful sound and still play using a wide dynamic range.
- **TypeK** — The type K headjoint has the sound concept of a powerful tone and wide dynamic range with good presence reaching the entire hall.
- **TypeY** — The type Y headjoint has taper which is similar to the French taper but with a double flare design. Warm tone color. Excellent center in the mid to high range.
- **TypeE** — The type E headjoint has high, narrow chimney walls. Excellent resonance and ideal air resistance for tone control. Direct, straightforward sound.
- **TypeH** — The type H headjoint has small undercut area, providing outstanding tone color flexibility.
- **TypeC** — The type C headjoint has the sound concept of a pure sound and rich resonance hidden in natural and graceful tone. It has a comfortable playing resistance with excellent feel and playability providing amazing diversity in expression.
- **TypeM** — The type M headjoint has the sound concept of a rich, colorful sound and tonal freedom and was specially developed for the YFL-900MV Series & YFL-800MV Series flute.

## Material Combination for Gold Flutes

The 900 series flutes are offered in three custom combinations of precious metals, designated as A, B, and C, (referenced below).

Please indicate the custom combination of your choice when placing an order.

### • A Type

### • B Type

### • C Type

Gold : Gold Sterling silver

Model Type	A Type	B Type	C Type
Body, Head & Footjoint	9K Gold	14K/18K Gold	
Rings, Posts & Ribs	Sterling silver		
Key Mechanism	Sterling silver		

An optional gold crown for A, B and C type flutes is available by special order.

# Oboes

## Duet+ Oboes

### Duet+ (pronounced 'duet plus')

Yamaha oboes have achieved clear sound quality and superb intonation by dramatically improving precision and stability of the bore. Also to cope with various quality issues inherent in wooden wind instruments, Duet+ models employ innovative techniques to form a protective layer next to the air column.

The combination of precious wood and state-of-the-art resin is not simply a "Duet" of tradition and technology - it's a "Plus" advantage indeed!

*Custom Series Duet+ Models*  
(YOB-831L, 832L)

#### ■ Ebonite Lining

The upper joint body is drilled out slightly larger, where a thin ebonite pipe with an oboe bore is adhered. Yamaha successfully developed oboes with both reliability and the warmth of wood.

*Intermediate Series Duet+ Models*  
(YOB-431M, 432M)

#### ■ Insert Molding

Yamaha is premiering this new technique to offer an affordable solution.

Molten resin is injected into the wooden tube, instantly forming the inside of the upper joint.

Please visit our website for more details at <http://www.yamaha.com/>

### Custom YOB-831

Semi-automatic octave system  
With optional thumb-plate key (YOB-831B)

### Custom YOB-832

Full-automatic octave system  
With optional F resonance key (YOB-832F)

### Intermediate YOB-431

Semi-automatic octave system  
With optional thumb-plate key (YOB-431B)

### Intermediate YOB-432

Full-automatic octave system  
With optional F resonance key (YOB-432F)

### Student YOB-241

Semi-automatic octave system  
ABS resin body

### Oboes

Model	System	Bore style	Mechanical features	Trill keys	Body material	Thumb-rest	Keys

# Bassoons

YFG-811

YFG-812C

*Custom*

## YFG-811/C

Brilliant tone, easy response  
Thinner wall

*Custom*

## YFG-812/C

Round warm tone, powerful projection  
Thicker wall

### ■ Compact Type

Each model is available with either traditional or compact type body styles. Compact type bassoons have a different configuration which permits the use of a smaller case. When ordering a compact system bassoon, add 'C' to the model number.

Compact system

### Mechanical Options

1. Right-hand top F# roller
2. Right-hand thumb F# rollers
3. Right-hand E rollers
4. Right-hand B $\flat$  roller
5. Right-hand pp slide system
6. Right-hand E $\flat$  trill key\*
7. Left-hand rollers for C# & pp
8. Left-hand low C & low D rollers
9. Left-hand E $\flat$  trill key\*
10. Joint hinge
11. A-pp arm connector
12. Silver tonehole tubes

Left-hand rollers for C# & pp lock

A-pp arm connector

Right-hand E rollers

\* Please note that either #6 or #9 may be ordered, but both cannot be installed on the same instrument.

Yamaha's right-hand E rollers facilitate technique without altering key size.

### Super Bocals

The shape of a bocal is just as important as the materials from which it is made and the method used for its construction. Yamaha offers four types to match the widest possible range of musical requirements.

#### ■ C Type

This configuration has a smooth, consistent feel from the lowest to highest tones for excellent playability. The C type bocal features extremely accurate intonation with rich tonal character. This is the "student" Super Bocal model, and is an ideal choice for all-around playing.

#### ■ E Type

The E type bocal combines comfortable breath resistance with a beautiful round tone which is constant throughout the instrument's range. Pianissimo low-notes are especially easy to play with this bocal. An excellent match for the symphony orchestra, chamber orchestra, or other ensemble.

#### ■ P Type

Outstanding high-range playability and tone make this bocal ideal for the soloist or first-chair orchestra player. In addition to high register security, the P-type bocal also offers a strong midrange with well-balanced low tones.

#### ■ V Type

The V type bocal combines many of the best properties of the C, E and P types. It features easy playability, outstanding expressive capability, and an exceptionally well-defined tonal core. Excellent clarity for both classical and modern compositions.

Type	Material	Pitch	Finish
C-type	N: Silver-plated	1: Normal pitch	S: Silver-plated
E-type			H: Hamilton-plated
P-type	B: Brass	2: Low pitch	N: Nickel-plated
V-type			

 Production on orders.

### Bassoons

Model	Characteristics	Fingering system	Mechanical features	Trill keys	Body	Keys	Bocals

# Woodwind Mouthpieces

## Yamaha Custom Ebonite Mouthpieces

Yamaha Custom saxophone and clarinet mouthpieces are sculpted out of choice ebonite, a high quality hard rubber which offers a deep resonance and tonal qualities similar to those of natural wood. Every step of the production, from the initial shaping of the mouthpiece 'blank' to the final hand crafting of the facing, is done by Yamaha's experienced artisans for complete control ensuring consistent high quality.

Yamaha has spent years working together with many of the world's greatest musicians, studying their mouthpieces and discovering ways to improve them. The Custom mouthpieces incorporate this experience in the design and manufacture of every mouthpiece in the series. The Custom mouthpieces are characterized by a warm rich tone with exceptional clarity. Their accurate intonation and comfortable playability have made them popular with many leading artists.

## Standard Model Mouthpieces

The Standard mouthpieces are made out of high quality phenol resin (plastic) and feature a design based upon the top grade Custom series. They are extremely consistent in specifications and playing quality, and offer excellent value for their price. The facing of this series is slightly shorter than that of the Custom series making them easier to play, and easier for beginning students to achieve a rich characteristic clarinet and saxophone sound. They also are available in a variety of sizes, to suit the needs players of many different styles.

## Clarinet

### Custom

Model	B <sup>b</sup> /A Clarinet	
	Facing length	Tip opening
4CM	21.0 mm	1.05 mm
5CM		1.10 mm
6CM		1.15 mm

### Standard

Model	E <sup>b</sup> Clarinet		B <sup>b</sup> /A Clarinet		E <sup>b</sup> Alto Clarinet		B <sup>b</sup> Bass Clarinet	
	Facing length	Tip opening	Facing length	Tip opening	Facing length	Tip opening	Facing length	Tip opening
3C	17.0 mm	0.95 mm	19.0 mm	1.00 mm	22.0 mm	1.30 mm	31.0 mm	1.60 mm
4C		1.00 mm		1.05 mm		1.40 mm		1.70 mm
5C		1.05 mm		1.10 mm		1.50 mm		1.80 mm
6C		1.10 mm		1.20 mm		1.60 mm		1.90 mm
7C		1.15 mm		1.30 mm		1.70 mm		2.00 mm

### Comments

Model	Comments
3C	Easy control and good response from lower to higher ranges, even for beginners
4C	Helps obtain a well-balanced tone over all octaves, for professionals and beginners alike
5C	Facilitates a richer, fuller volume than 4C, with a greater tonal variety
6C	An excellent mouthpiece for experienced players seeking powerful volume, strong tone, and rich tone variety
7C	A jazz favorite for penetrating volume with a rich, strong sound and precise tonality

The Custom series Ebonite mouthpieces give you a sound so deep, so smooth, so rich, you'll feel like you're playing a new instrument. They come in a wide range of sizes and configurations.

# Compact Trombone

The 350C is a full-sized trombone, using traditional slide positions, but it's much shorter in length. The ascending C valve allows you to play a full scale without using 6<sup>th</sup> or 7<sup>th</sup> positions. It is ideal for children who just can't stretch their arms far enough to play all the slide positions, but it is also suitable for adults.

## GP Series

Our GP Series have been created especially for professionals who require superior quality from their mouthpiece.

The GP Series features an innovative shape and extra-heavy gold-plate finish for players who prefer a focused, concentrated tonal core.

## Signature Series

For many years Yamaha has been producing special custom-made mouthpieces for the world's top players at our R&D Ateliers. These artists were not satisfied with any commercial models available and came to us with their dreams of a 'perfect' mouthpiece. They knew the kind of sound and response they wanted, and our technicians knew how to deliver it. Yamaha's Signature Series mouthpieces let others share the results of this great cooperation between artist and artisan.

### Allen Vizzutti / Trumpet – An incredible trumpet virtuoso

Model No.	Inner Diameter	Contour	Thickness	Cup Depth	Throat	Backbore
VIZZUTTI	16.67 mm	semi-flat	semi-thick	very shallow	3.56 mm	very narrow

The Vizzutti mouthpiece is also available with a gold-plated rim, cup, and inner bore.

### Bobby Shew / Trumpet – Legendary jazz artist

SHEW-LEAD	16.54 mm	semi-round	semi-thick	very shallow	3.56 mm	narrow
SHEW-JAZZ	16.85 mm	semi-round	semi-thick	medium	3.65 mm	medium
SHEW-FH	16.54 mm	semi-round	semi-thick	standard	4.40 mm	long taper

### Mark Gould / Trumpet – Professor at the Juilliard School

GOULD	17.30 mm	semi-flat	standard	semi-shallow	3.88 mm	standard
-------	----------	-----------	----------	--------------	---------	----------
